Natya Sashtra Chapter 6 — by Bharatmuni 200 BC - 200 AD
it was according to legend written at the
fifth veda. The story goes like this:

After continuous fighting b/w the Devas & Asuras, the Devas approached
Brahma and told him that because of Asuras, the general population
was gradually becoming immoral & chaotic. They said that not all
people on earth can read the Vedas & in order to be better
human beings they needed some medium by which they could be easily
trained morally.

Brahma supplied that Shiva had already written a play and Brahma understood through that play that theatre is the best medium for moral instruction. He then called upon Bharatmuni and asked him to write a manual for how to do a play. This included things like what yagna has to be performed before building the theatre house, the various directions for the hall how the actors should perform, the clothes worn in chapter 6 (31) what happens in the mind of the spectator as he watches the play. Since the natyasastra was ultimately instructional → 5th vedā |
